# Subject Index

Volume 33, 1989

Contributor index on page 957.

- Acquired immune deficiency syndrome (AIDS)**  
CNS HIV infection, CSF manifestations, 233  
Cryptosporidiosis, diagnosis by brushing cytology of small intestine, 707  
Lymph node FNA, pseudogaucher cell-like histiocyte as marker of mycobacterial infection, 739
- Actinomyces**  
In Papanicolaou smear of IUD user associated with amoeba, 298  
Parotid  
    FNAC diagnosis, 278  
    With Curschmann's spirals in FNA, 903
- Adamantinoma, recurrent, FNAC diagnosis, 635**
- Adenocarcinoma**  
Breast, node-negative, DNA analysis, 715  
Cervix *in situ*, comparison of cytologic features, 697  
Effusions, use of MAb B72.3 as diagnostic adjunct, 724  
Esophagus, cytopathologic diagnosis, 713  
Rectum, nuclear morphometric measurements, 562
- Adenoma**  
Nipple, cytopathologic features, 188  
Pleomorphic salivary gland metastatic to lung, FNAC diagnosis, 1002  
Thyroid follicular  
    Semi quantitative comparison with colloid nodule in FNA, 722  
    Versus papillary carcinoma, CIM, 738
- Adenomatoid tumor, paratesticular, FNABC, 6**
- Adenosis tumor of breast, FNAC with IC and EM, 181**
- Adrenal gland**  
Cortical carcinoma versus hyperplasia, FNA, 757  
Disseminated histoplasmosis, FNAB diagnosis, 337, 341
- Alphafetoprotein (AFP), measurement in ascitic fluid, 705**
- American Society of Clinical Pathologists (ASCP), QA activities for cytopathology, 431**
- American Society of Cytotechnologists (ASCT), QA activities for cytopathology, 451**
- American Society of Cytology (ASC)**  
Cytopathology laboratory accreditation, 443  
Education and training programs, 448
- Amoebae in Papanicolaou smear**  
Associated with *Actinomyces* in IUD user, 298  
Associated with squamous carcinoma in irradiated case, 301
- Amyloidosis, liver, FNAC diagnosis, 935**

## Breast (continued)

## FNA (continued)

Pneumothorax following, 140

Positive predictive value, 894

High-grade mucoepidermoid carcinoma, FNAC with EM, 195

Infiltrating ductal carcinoma, DNA measurements in cases with long-term follow-up, 563

Intraoperative cytology in evaluation of lumpectomies, 702

Lesions, NORs and silver-binding nucleoli in FNA, 173

Liposarcoma, cytologic features, 733

Local recurrences, FNAC, 140

Malignant neoplasms in men, FNAC diagnosis, 703

## Masses

Analysis of FNA results, 613

In young patients, FNA, 713

## Metastases

Ileal carcinoid, FNA diagnosis, 191

Malignant schwannoma, FNAC, 372

Prostatic cancer, FNAC with IC, 899

Myosperulosis, FNA, 729

Nipple, adenoma, cytopathologic features, 188

Nodule with *Wuchereria bancrofti*, FNA, 390

Osteogenic sarcoma and metaplastic carcinoma, IC differentiation, in FNA, 620

Palpable benign and malignant lesions, FNAC in management, 93

Radiation-induced changes, FNAC, 176

Potential pitfall in FNAC, 141

Tumors in rodents, image and ploidy analysis, 720

Bronchial aspiration diagnosis of pulmonary hydatid cysts, 655

Bronchial lavage diagnosis of multiple endobronchial glandular cell tumor, 516

Bronchial washing cytology of plasma cell myeloma involving lung, 519

Bronchoalveolar lavage (BAL)

Assessment of pulmonary HD, 527

Diagnosis of drug-induced pulmonary toxicity, 533

Effect of membrane filtration on neutrophil recovery, 544

## Image cytometry

Lung cancer, 737

Reed-Sternberg cells, 728

*Pencillium marneffei* in fluid, 523*Pneumocystis carinii*, fluorescence microscopy of Papanicolaou-stained specimens, 557

Simultaneous enumeration of T-cell subsets and macrophages by immunoenzyme double staining, 550

Smears, iron staining to detect occult hemorrhage, 716

## Brushing cytology

Pancreas, combined with ERP for early detection of cancer, 870

Small intestine, diagnosis of cryptosporidiosis in AIDS, 707

Carcinosis, tumoral, FNAC, 726

*Campylobacter*-like organisms in gastric brushings, 284

## Cancer

Breast, DNA grading of malignancy, 403

Representativity and reproducibility, 403

## Cervix

Invasive, rate of cytologic detection without mass screening, 839

Public health perspective of screening, 471

USAF cytology laboratories screening program, 475

Lung, clinical applications of FNAC, 712

## Pancreas

Early detection by combined brushing and ERP, 870  
FNAC, 145*Candida*, detection in men by urethral cytology, 11

Carcinoembryonic antigen (CEA)

Assay in FNA of cystic liver lesions, 852

Measurement in ascitic fluid, 705

## Carcinoid tumor

Ileal metastatic to breast, FNA diagnosis, 191

Lung, FNAC, 735

## Carcinoma

Ampullary, cytometric predictors of prognosis after resection, 690

## Bladder

High-grade versus polyomavirus infection, 887

Transitional cell, cytokeratin MAB identification of cell grades, 708

## Breast

Apocrine-medullary, FNA with IC and EM, 104

DNA malignancy grading, 403

ER analysis using IC and image analysis, 947

Giant tumor cells, FNAC, 109

High-grade mucoepidermoid, FNAC with EM, 195

Infiltrating ductal, DNA measurements in cases with long-term follow-up, 563

Osteogenic metaplastic, IC identification in FNA, 620

PR analysis using IC and image analysis, 947

Squamous, FNAC diagnosis, 201

Cervix, karyometric marker features adjacent to, 693

## Endometrium

Papillary serous, cytologic features, 120

Secretory, 127

Liver, primary versus metastatic in FNA, immunofluorescence identification of endothelial cells, 267

## Lung

Bronchioloalveolar, morphologic and IC studies, 692

Image cytometry of BAL specimens, 737

Large cell, cytomorphometry, 269

Neuroendocrine of skin, diagnostic significance of intermediate filament buttons in FNA, 420

## Ovary

Characterization, 950

Papillary, correlation of LM and EM features, 948

## Pancreas

Diagnosis by FNAC and computerized cytomorphometry, 691

Carcinoma (continued)

Pancreas (continued)

Elastase-secreting acinar cell, FNAC with EM and IC, 157

FNA, 875

Predominantly squamous cells, intraoperative FNA plus IC and EM, 153

Parotid, small cell undifferentiated with neuroendocrine variant, FNAC with IC and EM, 164

Squamous

Associated with amoebic cervicitis in irradiated patient, 301

Metastatic cells in serous fluids, 245

Thyroid

Clear cell, FNAC, 135

Medullary with melanin production and glandular differentiation, intraoperative imprint cytology, 61

Melanin-producing with glandular differentiation, 946

Papillary

Diagnostic utility of nuclear grooves, 16, 21

Correlation of LM and EM of nuclear features, 948

Vagina, sarcomatoid squamous cell, 142

Carotid body

Paraganglioma, FNAC, 679, 681

Tumor, FNAC diagnosis, 682

Carpet beetle larval hairs in sputum specimens, 286

Cavitron Ultrasonic Surgical Aspirator (CUSA), CNS neoplasms

Cytopathology of specimens, 576

IC analysis of specimens, 707

Cell cycle, cytometric analysis of subpopulations, 691

Cells

Columnar in posthysterectomy vaginal smear, 721

Dyskeratotic as predictors of condylomas in biopsies, 223

Endocervical

Cytobrush versus cotton swab for collection, 849

Markers of smear adequacy, 687, 730, 843

Intraobserver and interobserver variation in assessment, 215

Radiation changes in brushing specimens, 709

Endothelial, differentiation of primary and metastatic carcinoma in liver FNA, 267

Langerhans', IC demonstration in cervical smears, 219

Mesothelial

Analysis in CAPD lavage fluid, 591

Immunostaining, 136

Reed-Sternberg in pulmonary HD, imaging cytometry, 728

Squamous carcinoma, in serous fluids, 245

Vegetable, possible confusion with helminth eggs in sputum, 421

Centers for Disease Control (CDC)

Center for Chronic Disease Prevention and Health Promotion, 489

Projects to identify barriers to optimal cervical screening, 460

Central nervous system (CNS)

HIV infection, CSF manifestations, 233

Neoplasms, cytopathology of CUSA specimens, 576

Tumors, IC of CUSA specimens, 707

Cerebrospinal fluid, manifestations of HIV infection of CNS, 233

Cervix brush, analysis of sampling for cervical smears, 843

Cervicitis, amoebic, associated with squamous carcinoma in Papanicolaou smear of irradiated patient, 301

Cervix

Adenocarcinoma *in situ*, comparative cytologic features, 697

Atypia, mild (benign), significance as a marker of CIN, 831

Bacteriases, cytodiagnosis, 287

Benign versus malignant specimens, diagnosis by multi-fiberoptic microspectrophotometer and FCM, 565

Cancer

CDC projects to identify barriers to optimal screening, 460

Screening from a public health perspective, 471

USAF cytology laboratory screening project, 475

Carcinoma

Karyometric marker features adjacent to

*In situ* lesions, 693

Invasive lesions, 693

Squamous, associated with amoebic cervicitis, 301

*Chlamydia trachomatis* infection

Asymptomatic, comparison of Papanicolaou and immunofluorescence staining and *in situ* hybridization, 115

Evaluation of proposed cytomorphologic criteria for diagnosis in Papanicolaou smears, 309

LM and EM analysis in smears, 695

Cytology

Bethesda System for reporting diagnoses, 567

Expert system as tutoring tool, 132

Early dysplastic lesions, predictive value of phenotyping cytologic characteristics, 688

HPV infection

Comparison of cytomorphology, hybridization and polymerase chain reaction in Cytobrush specimens, 696

Dyskeratotic cells as predictors, 223

Features in Papanicolaou smears, 696

Frequency and association with CIN

In cervicovaginal smears, 413

In young women, 319

Inclusion bodies in cells, 314

Koilocytotic atypia related to, 686

Intraepithelial neoplasia (CIN)

Association with HPV infection

In cervicovaginal smears, 413

In a young population, 319

Cytologic detection in population lacking mass screening, 839

## Cervix (continued)

## Intraepithelial neoplasia (continued)

- DNA analysis in punch biopsy specimens, 564
- Epidemiologic trends, 463
- Mild atypia as marker, 831
- Predictive value of phenotypic cytologic characteristics, 688

## Invasive carcinoma, cytologic detection in population lacking mass screening, 839

## Lesions, diagnostic and prognostic value of DNA cytometry in the cytologic evaluation, 563

## Lymphoma, primary malignant, cytology and IC, 228

## Malacoplakia, intracellular bacilli in vaginal smears, 410

## Microbiologic flora in Papanicolaou smears, classification, 276, 687

## Parasites, cytologic detection in smears, 944

## Preneoplastic lesions, IC localization of GST-P, 722

## Sampling

- Analysis of methods, 697, 843
- Combined Cytobrush-spatula method, 705
- Criteria of adequacy, 687
- Efficacy of Cytobrush versus cotton swab for collection of endocervical cells, 849

## Screening

- National registry of diagnoses in the Netherlands, 225
- Problem of false negatives, 814
- Statistical measurements of accuracy, 819

## Smears

- Analysis of sampling methods, 697, 843
- Combined Cytobrush-spatula sampling, 705
- Endocervical cells as markers of adequacy, 739, 843
- Interobserver/intraobserver variation in assessment, 215
- IC demonstration of Langerhans' cells, 219
- Intralaboratory rescreeing in QA, 479
- Preparation for QC, 814
- Timing of preparation during colposcopy, 324
- Use of hairspray as fixative, 419

## TB

- Coexisting with *T vaginalis*, 945
- Pseudotumoral presentation, cytology, 305

## Chemodectoma, carotid body, FNAC, 679

*Chlamydia trachomatis* infection

- Asymptomatic women, comparison of Papanicolaou and immunofluorescence staining with *in situ* hybridization, 115

## Detection in men by urethral cytology, 11

## Evaluation of proposed cytomorphic criteria for diagnosis in Papanicolaou smears, 309

## LM and EM analysis of cervical smears, 695

## Cholangiocarcinoma, associated with liver fluke infestation, cytodiagnosis, 865

## Chondroid bone lesions, FNAC differential diagnosis, 717

## Chordoma, sacrococcygeal, FNAC with IC and EM, 89

## Chromatin changes due to calorie restriction, computerized morphometric differentiation, 950

 Pituitary, adenoma versus hyperplasia, FNA, 757  
 Plasma cell neoplasms, cytology, 726  
 Pleural fluid, squamous carcinoma cells in, 245  
*Pneumocystis carinii*  
   Fluorescence microscopy of Papanicolaou-stained BAL specimens, 557  
   IC diagnosis in cytologic and surgical specimens, 723  
   Rapid detection with microwave oven silver staining, 416  
 Pneumothorax, complication of breast FNA, 140  
 Polymerase chain reaction, detection of HPV infection in cervical brushings, 696  
 Polyomavirus, differentiation from high-grade bladder carcinoma, 887  
 Postpartum, luteinized follicle cysts with cellular atypia, FNAC, 711  
 Proficiency testing  
   Cytologic screening, 479  
   LPTP, 484  
 Progesterone receptor (PR) analysis  
   Breast cancer, use of Cytospins, 724  
   Breast carcinoma, use of IC and image analysis, 947  
 Prognosis  
   Ampullary carcinoma after resection, cytometric and histometric predictors, 690  
   Patients with malignancy-associated effusions, 911  
 Prostate  
   Cancer metastatic to breast, FNAC and IC, 899  
   Dysplasia and cancer, comparison of FNA, core biopsy and cytologic washings, 737  
   FNA, 767  
     Image and textural analysis, comparison with breast FNA, 405  
     Well-differentiated carcinoma versus hyperplasia, 757  
   Pseudosarcoma, vagina, cytology, 142  
 Pseudotumor, inflammatory  
   Liver, FNAC, 259  
   Lung, FNAC, 917  
 Pubis, osteomyelitis, FNA diagnosis, 649  
 Public health perspective of cervical cancer screening, 471  
  
 Quality assessment of cervical smears, intraobserver and interobserver variation, 215  
 Quality assurance (QA)/quality control (QC) in cytopathology, 559, 560  
   Cervical cytology  
     Approach to the problem of false negatives, 814  
     National registry of diagnoses in the Netherlands, 825  
     Statistical measurements, 819  
     Measures for diagnostic cytology laboratories, 423, 427  
     Society programs  
       ASC, 443  
       ASCP, 431  
       ASCT, 451  
  
 Quality assurance (continued)  
   CAP, 434, 439  
   State laboratory in-house program, 487  
  
 Radiation changes  
   ER in breast carcinomas, IC and image analysis, 947  
   PR in breast carcinomas, IC and image analysis, 947  
 Radionuclide perfusion study, solitary cold thyroid nodule, comparison with FNAC, 41  
  
 Receptors  
   ER in breast carcinomas, IC and image analysis, 2002  
   Fc differentiation of mesothelial and malignant cells in effusions, 1003  
   PR in breast carcinomas, IC and image analysis, 2001  
 Rectum, adenocarcinoma, nuclear morphometric measurements, 562  
 Recurrence, breast cancer, FNAC, 140  
 Registry, cervical cancer diagnoses in the Netherlands, 825  
 Repair cells, equine uterine in cytologic and histologic specimens, 397  
 Retroperitoneum, ganglioneuroblastoma, 80  
 Sacrococcygeal chordoma, FNAC with IC and EM, 89  
 Salivary gland  
   Benign neurilemmoma masquerading as pleomorphic adenoma, FNA, 907  
   Curschmann's spirals and actinomycosis, FNA, 903  
   FNAC, 701, 732, 734  
   Mucoepidermoid carcinoma versus squamous metaplasia, FNA, 757  
   Pilomatrixoma, 274  
   Pleomorphic tumor versus pleomorphic adenoma, FNA, 757  
   Sarcoidosis, FNAC, 169  
   Small cell undifferentiated carcinoma, neuroendocrine variant, FNAC with IC and EM, 164  
*Salmonella* epididymitis in renal transplant with papillary clusters in voided urine, 280  
 Sampling, cervical  
   Comparative analysis of methods, 843  
   Efficacy of Cytobrush versus cotton swab for collection of endocervical cells, 849  
 Sarcoidosis, parotid, FNAC, 169  
 Sarcoma  
   Alveolar soft part, FNA, 729  
   Kaposi's, FNA, 767  
   Primary osteogenic of breast, IC identification in FNA, 620  
  
 Schwannoma  
   Malignant metastatic  
     To breast, FNAC, 372  
     To vertebra, FNAC, 377  
   Preoperative FNA, with EM and IC, 381  
   Salivary gland, FNA, 907  
 Screening for cervical cancer (see also QA)  
   CDC projects to identify barriers to optimal, 460  
   Detection of abnormalities without a screening program, 839

# Screening for cervical cancer (continued)

- Intralaboratory rescreeing, 479
- Measurements of proficiency via examination, 479
- National registry of diagnosis in the Netherlands, 825
- Problem of false negatives, 814
- Public health perspective, 471
- Statistical measurements of accuracy, 819
- USAF cytology laboratory program, 475
- Scrotum, adenomatoid tumor, FNAC, 6
- Seminoma, spermatocytic, FNAC, 627
- Sexually transmitted disease (STD)
  - Clinic population, significance of mild atypia as marker of CIN, 831
  - In men, detection by urethral cytology, 11
- Shape, nuclear, evaluation of irregularity, 2006
- Sinusoidal hepatolymphoid malignancy, cytology of FNA and effusion, 674
- Skin
  - Melanoma, expert system for early detection, 132
  - Neuroendocrine carcinoma, diagnostic significance of intermediate filament buttons in FNA, 420
  - Pigmented lesions, FNA, 767
- Skull, eosinophilic granuloma, FNAC diagnosis, 683
- Small intestine, brushing cytology diagnosis cryptosporidiosis in AIDS patients, 707
- Smears
  - Cervical/cervicovaginal/Papanicolaou, cytology
    - Adequacy
      - Criteria, 687
    - Endocervical cells as marker, 730, 843, 847
    - Intraobserver and interobserver variation in assessment, 215
  - Amoeba and squamous carcinoma in irradiated patient, 301
  - Analysis of sampling methods for preparation, 697, 843
  - Bethesda System for reporting diagnoses, 567
  - Chlamydia trachomatis* detection, 695
    - Asymptomatic women, utility of different stains, 115
  - Evaluation of proposed cytomorphologic criteria, 309
  - Classification of microbiologic flora, 276, 687
  - Cytobrush-spatula sampling, 705
  - Detection of parasites, 944
  - HPV infection
    - Features, 696
    - Frequency and association with CIN, 413
    - Inclusion bodies in infected cells, 314
  - Interlaboratory rescreeing for QC, 479
  - IUD user, association of amoebae and actinomycosis, 298
  - Microglandular endocervical hyperplasia, 738
  - Pessary users, 720
  - Preparation in colposcopy clinic, 324
  - Use of hairspray as a fixative, 419

# Smears (continued)

- Endo-Pap endometrial, correlation of cytodiagnosis and presence of lesions, 721
- Vaginal posthysterectomy, columnar cells in, 721
- Soft tissue
  - Alveolar soft part sarcoma, FNA, 729
  - Cysticercosis, FNA diagnosis, 663
  - Pseudorheumatoid solitary nodule, FNAC, 393
  - Schwannoma, preoperative FNA diagnosis plus IC and EM, 381
  - Spermatocytic granuloma, FNAC, 1
  - Tumor, FCM as adjuvant to FNA, 730
  - Wuchereria bancrofti* swellings, FNA, 390
- Spinal cord, echinococcosis, diagnosis in cyst fluid, 138
- Spine, metastatic Hürthle cell carcinoma, FNA, EM and IC, 639
- Splenocytes, normal and calorie-restricted, computerized morphometric analysis of chromatin changes, 950
- Sputum cytology
  - Carpet beetle larval hairs in slides, 286
  - Vegetable cells as possible pitfalls, 44
- Stains/staining (see also IC, MAb)
  - Double immunoenzyme of BAL fluid for simultaneous enumeration of macrophages and T-cell subsets, 550
  - Iron, to detect occult hemorrhage in BAL smears, 716
  - Silver
    - Grocott's using microwave oven, for rapid detection of *Pneumocystis*, 416
    - Interphase NORs to distinguish neoplastic from non-neoplastic cells in effusions, 491
    - Thionin-eosin for bronchial cytology, 406
    - Toluidine blue for wet films for rapid evaluation of cytologic specimens, 706
- Statistical analysis
  - Cervical cytologic accuracy, 819
  - Immediate interpretation of FNA biopsies, 791
- Stomach
  - Brushing identification of *Campylobacter*-like organisms, 284
  - Endoscopic biopsy supernate, cytologic examination, 137
  - Paneth cell metaplasia, image analysis quantitation, 405
  - Premalignant glandular lesions, cytology, 701
- Stomal lesions, FNAC evaluation, 734
- Supernates, endoscopic and colonoscopic, cytologic examination, 137
- Taenia solium*
  - Breast cysts, FNAC diagnosis, 659
  - Soft tissue swellings, FNA diagnosis, 663
- Terminology, cervical cytology, Bethesda System, 567
- Testes
  - Neoplasms, FNAC diagnosis, 631
  - Spermatocytic seminoma, FNAC, 627

Thorax, lesions, nonaspiration fine needle sampling, 805

#### Thyroid

Clear cell carcinoma, FNAC, 135

Colloid nodule versus

Follicular adenoma, semiquantitative FNA, 722

Follicular neoplasm, value of FNA cell blocks, 53

Cystic nodules harboring malignancy, problem in FNAC diagnosis, 941

Follicular adenoma versus

Follicular carcinoma, FNA, 757

Papillary carcinoma, computerized interactive morphometry, 738

Grave's disease, FNAC, 36

#### Hürthle cell

Carcinoma metastatic to bone, FNA, EM and IC, 639

Tumor, benign versus malignant, FNA, 757

#### Lesions

FNAB technique, 939

Significance of paravacuolar vacuoles, 929

Lymphoid lesions, FNAC and IC, 48

Lymphoma versus lymphocytic/lymphoid thyroiditis, FNA, 757

Medullary carcinoma, melanin-producing with glandular differentiation

FNA, 946

Intraoperative imprint cytology, 61

Microfilariae in FNA smear, 942

#### Nodule

FNAC, 699

Infarction after FNA, 940

Solitary cold, FNAC, 41

#### Papillary carcinoma

Correlation of LM and EM nuclear features, 2005

Nuclear grooves, significance in cytologic specimens, 16, 21

#### Tumors

FNAB and frozen section study in areas of endemic goiter, 27, 31

Nonaspiration fine needle sampling, 939

Tibia, recurrent adamantinoma, FNAC diagnosis, 635

Tissue processing, influence on nuclear morphometric features, 690

Toluidine blue staining of wet films for rapid evaluation, 706

#### Transplant

Heart, pulmonary aspergillosis diagnosed by FNAC, 708

Kidney, *Salmonella* epididymitis, 280

Liver, BAL assessment of pulmonary opportunistic infections, 539

Trauma patient, *Giardia lamblia* diagnosed in peritoneal fluid, 283

#### *Trichomonas vaginalis*

Cervical with coexisting TB, smear diagnosis, 945

In men, detected by urethral cytology, 11

Tuberculosis (TB), cervical

Coexisting *Trichomonas* infection, 945

Pseudotumoral presentation, 305

#### Tumor

Benign clear cell of lung, FNABC, 511

Brain, MAb staining for GFAP in cytodiagnosis, 922

Carotid body, FNAC diagnosis, 682

#### Lung

Double, quantitative pathologic analysis, 269

IC analysis on FNA cytocentrifuges, 406

Multiple endobronchial granular cell, lavage cytodiagnosis, 516

Multiple primary malignant, FNA diagnosis, 800

Pancreas, malignant papillary-cystic, FNAC 709

Poorly differentiated malignant, value of cytokeratin and LCA staining in FNA, 385

Primary, value and limitations of FNA in diagnosis, 741

Seeding in needle biopsy, risk of, 936

#### Thyroid

FNAB and frozen section in management in endemic goiter areas, 27, 31

Nonaspiration fine needle sampling, 939

Tumoral calcinosis, FNAC, 726

United States Air Force (USAF), cytology screening program for cervical carcinoma, 475

Urethral cytology detection of male

HPV infection, sensitivity, 686

HSV infection, Cytobrush sampling, 417

STD, 11

Urine, computer image analysis, selective mapping algorithm for, 564

Urinary cytology, detection of *Salmonella* in renal transplant patient, 280

#### Uterus

Equine, repair cells in cytologic and histologic specimens, 397

Primary malignant lymphoma, IC and cytodiagnosis, 228

#### Vagina

Bacterioses, cytodiagnosis, 287

Cytology, Bethesda System for reporting diagnoses, 567

Posthysterectomy smears, columnar cells in, 721

Squamous cell carcinoma with sarcomatoid features, cytology, 142

Vascularization, tumor-invaded brain, image analysis estimation, 694

Ventilation therapy in newborns, airway cell changes, tracheobronchial aspiration cytology, 723

Vertebra, metastatic malignant schwannoma, FNAC, 377

Veterinary cytopathology, repair cells in equine uterine cytologic and histologic specimens, 397

#### Vimentin, MAb stain for

Liver FNA, differentiation between primary and metastatic carcinoma, 267

Lymph node FNA in diagnosis of NHL, 268

**Virus** (see also HPV, HSV, EBV)

Human immunodeficiency (HIV), CSF manifestation of  
CNS complications, 233

Polyoma, versus high-grade bladder carcinoma, 887

**Wilms' tumor**, kidney, FNAC, 263

**Wuchereria bancrofti**

Epididymal nodule, FNA, 421

Soft tissue swellings, FNA, 390

**Xeroradiography**, solid cold thyroid nodule, comparison  
with FNA, 41

---

### Dates of I.A.C.-Sponsored Events

The International Academy of Cytology will sponsor the following events in the foreseeable future:

Date	Event	Place
March 17-24, 1990	34th Tutorial on Clinical Cytology	Knickerbocker Hotel Chicago, Illinois, U.S.A.
March 25-27, 1990	7th International Conference on Automated Cytometry and Histometry Including Expert Systems	Knickerbocker Hotel Chicago, Illinois, U.S.A.
October 20-27, 1990	16th International Tutorial on Clinical Cytology	Vienna Intercontinental Hotel Vienna, Austria
May 8-14, 1991	17th International Tutorial on Clinical Cytology	Nihon Toshi Center Tokyo, Japan
May 3-7, 1992	11th International Congress of Cytology	Hyatt Hotel Melbourne, Australia
May 22-25, 1995	12th International Congress of Cytology	Madrid, Spain

Please direct all inquiries to:

The International Academy of Cytology  
Committee on Continuing Education  
5841 South Maryland Avenue, HM 449  
Chicago, IL 60637, U.S.A.
